DETAILED ACTION

1. In response to the Petition to Withdraw Holding of Abandonment being granted, this Restriction is being remailed.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-6, 8 and 10-24, drawn to a server and process for caching intermediate code, classified in class 709, subclass 203.
 - II. Claims 7, 9 and 25, drawn to a memory replicator and process for maintaining elements in a data structure, classified in class 707, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the server and process from Group I for caching intermediate code does not require the memory replicator as it is claimed in Group II. The subcombination has separate utility such as maintaining elements in a data structure such that the data structure remains intact and updated.

Art Unit: 2155

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Edward Langer (30,564) on 2/3/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. In accordance with 35 U.S.C. 133, a shortened statutory period of one month (not less than 30 days) is hereby set forth to reply to this Office Action. See also MPEP 710.02(b).
